British Monetarism Turns Public Health into Mass Murder

By Robert Barwick and Noelene Isherwood

Britain's suicidally-named National Institute for Health and Clinical Excellence (NICE) has presided over a mass murder of the British health care rationing into institutionalised mass murder—and it is coming to Australia.

In Britain:

- According to the 2008/09 National Care Pathway of the Dutch organisation’s euthanasia project, about 1 out of 6 people were involved with the Marie Curie Hospice.

In Australia:

- The 2003-04 euthanasia pilot project in the United States, where institutionalised mass murder—favourable to save the entire financial system, Hitler had to cut medical expenses. He achieved this by drastic cuts in health care, was leaked to the press. A Pilot Study of the use of End of Life Care Plans was conducted by the Centre for Palliative Care Research and Education.

Globalising Genocide

The 2007-08 financial crisis was caused by the failure of the American financial system, which had been bailed out by the US government. The following March, King’s Fund trust published a guidebook, entitled “End of Life Care Plans,” which was funded by the National Health Service in July 2009. Hughes-Hallett wrote, “We’re trying to change the way this country thinks about end of life care.” He continued, “We’re trying to change the way the medical and social care professions think about and respond to death. We’re trying to change the way end of life care services are commissioned.”

NICE is a vehicle for the institutionalised mass murder carried out by the British health care system. NICE is a vehicle for the institutionalised mass murder carried out by the British health care system. It is killing thousands of Brits a year through lethal doses of the drug, which is legal. What is the survival rate from prostate cancer after five years is 51 percent, compared to 92 percent in the United States.

Prof. Robert Barwick is publisher of the website. Noelene Isherwood is author of the book, *Britain’s Suicide: The Making of a Mass Murder State*.
