CEC testimony to Murray-Darling Inquiry: Government has forfeited the right to exist!

The following text will be read to the Griffith meeting of the Murray-Darling Inquiry convened by Federal MP Tony Windsor, barring any attempt to disallow CEC's remarks onto the record.

Good morning. My name is Glen Isherwood, I represent the Citizens Electoral Council. The Citizens Electoral Council is an Independent Political Party that represents thousands of farmers and concerned citizens, from all over Australia.

I would like to establish four main points, which I shall simply state right now, that have been elaborated in quite some detail in our *New Citizen* newspaper; which was also our submission to the Inquiry.

Number one: The entire so-called "science" of "ecosystems", of "river health", and of "wetlands" on which this so-called Basin reform is based, is just plain quackery. It has no more reality to it than the fraud of so-called "climate change", which is now widely discredited. Any honest duck would be ashamed of this "wetlands" nonsense.

Number two: As is acknowledged by everyone concerned, this entire process of cutting water to agriculture in the Basin, has been 100% directed by a supra-national body; the Ramsar Convention on Wetlands. Ramsar was founded by and is just a front for the world's two major so-called "environmental" lobbies, the WorldWide Fund for Nature (WWF) and the International Union for the Conservation of Nature and Natural Resources (IUCN). Both of these are provably *British Imperial* bodies, dedicated to the preservation of the still-existing British Empire, and to the looting and destruction of any sovereign nations—in this case Australia.

Number three: All environmentalism in the post-WorldWar II period was founded by leading figures of the British Eugenics Society, and its various fronts. Thus, the openly stated *purpose* of the WWF and the IUCN, and their clones here in Australia, such as the Australian Conservation Foundation and the Wentworth Group of Concerned Scientists, is so-called "population reduction", namely, genocide. *That* is the purpose of these so-called "water reforms" in the Basin!

Number Four: It is the Citizens Electoral Council's view, that all of the so-called science, premised on arguments of 'conserving' eco-systems in a 'natural' state, independent of all human activity, as is pushed under Ramsar, and which forms the environmental objectives of the Water Act, is both impossible, and actually destructive.

Rather, the Citizens Electoral Council are of the firm conviction, that human beings, through their *natural intervention* into the biosphere, as is exemplified through the construction of dams and irrigation, can improve the biosphere allowing it to support more and more life.

Contrary to the environmentalist ideology, human creativity can improve nature, where nature itself never could. While we have not mastered the ability to prevent droughts, and floods, we have the knowledge and creativity to live with

them, to mitigate them, and to continually increase our mastery of nature, for the good of both mankind, and the biosphere as a whole.

In light of this, Mr. Chairman, I, on behalf of the Citizens Electoral Council, recommend the following several actions be taken up by all the Committee members of this Inquiry, and by all members of the Australian Parliament:

First: Repeal the 2007 Water Act.

Second: Put in place a Farm Debt Moratorium, and Protective Measures for Homeowners, along the lines of what the Citizens Electoral Council has called for in draft legislation, titled the *Productive Industries and Farms Domestic Debt Moratorium, Amelioration, and Restructuring Bill 1994* and *The Homeowners and Bank Protection Bill 2008*.

And Thirdly: Rebuild the Physical Economy of Australia, with a national government-owned bank like the original Commonwealth Bank, that can extend credit at low interest rates, to farmers and other productive industries, to finance the rebuilding and upgrading of our nation's infrastructure. This must also include new large scale infrastructure projects such as the Clarence River Scheme and the long overdue Bradfield Scheme.

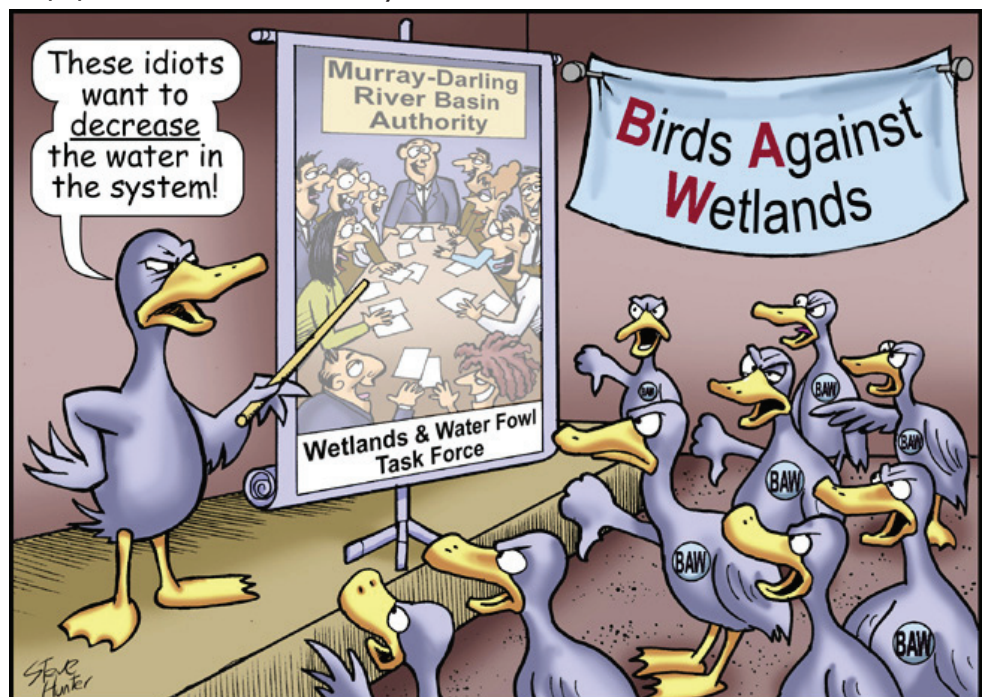

To conclude, Mr Chairman, I would like to quote New South Wales Premier Jack Lang:

"The one God-given, inalienable right of man, is the right to live.

If man or woman is denied the right to work, they still retain the right to live.

The Government that fails to realise that, has forfeited the right to exist."

Thankyou.

B.A.W. – a new organisation is born!

Tony Windsor unmask himself as a fraud

In remarks following his committee's 25th January hearing in Griffith, Tony Windsor dropped his carefully-cultivated mask of "impartiality" and "genuine concern" for agriculture in the Murray-Darling Basin, and came out swinging in defence of the *Water Act 2007*, the act which mandates the virtual shutdown of Australia's food bowl.

Glen Isherwood of the Citizens Electoral Council had delivered concise, hard-hitting testimony which concluded with a call to repeal the *Water Act*. Windsor, on the other hand, snarled to *The Area News* later that any talk of repealing the *Water Act* was simply a "distraction from the 'main game'", and that "I think there's too much emphasis on us revisiting the *Water Act*". Up until now, Windsor had carefully avoided an outright defence of the *Water Act*, since such a stance would clearly expose his entire series of "independent hearings" for the farce it is. Indeed his 25th January remarks in Griffith have been suppressed by virtually all news media.

Mr Isherwood had opened his provoking remarks, which drew loud applause from the 400 present, by stating that, "The entire so-called 'science' of 'ecosystems', of 'river health', and of 'wetlands' on which this so-called Basin reform is based, is just plain quackery. It has no more reality to it than the fraud of so-called 'climate change', which is now widely discredited. Any honest duck would be ashamed of this 'wetlands' nonsense."

But Windsor retorted that "The substantive issues of river health, river management, icon sites and all those things are there irrespective of how the *Water Act* is constructed."

Windsor lied. The *Water Act* was written entirely to conform to the supranational dictates of the Ramsar Convention on Wetlands, and it is *Ramsar itself* which makes up the quack science of "river health", "icon sites" aka wetlands, etc. In fact, as Mr Isherwood stated in his testimony, the entire Ramsar apparatus was created by the still-existing British Empire as an instrument to override national sovereignty, to shut down much of the world's food production, and to slash the world's population:

"As is acknowledged by everyone concerned, this entire process of cutting water to agriculture in the Basin, has been 100 per

cent directed by a supra-national body; the Ramsar Convention on Wetlands. Ramsar was founded by and is just a front for the world's two major so-called "environmental" lobbies, the World Wide Fund for Nature (WWF) and the International Union for Conservation of Nature and Natural Resources (IUCN). Both of

these are provably *British Imperial* bodies, dedicated to the preservation of the still-existing British Empire, and to the looting and destruction of any sovereign nations—In this case Australia.

"All environmentalism in the post-World War II period was founded by leading figures of the British Eugenics Society, and its various fronts. Thus, the openly stated *purpose* of the WWF and the IUCN, and their clones here in Australia, such as the Australian Conservation Foundation and the Wentworth Group of Concerned Scientists,

is so-called "population reduction", namely, genocide. *That* is the purpose of these so-called 'water reforms' in the Basin!"

The obvious question, therefore, is what motivates Windsor to support this British imperial attack on Australia? Is he merely living up to his name? Or is there something nastier afoot?

Tony Windsor, royal sell-out.

Media notes CEC's influence

The *Strewh* column in *The Australian* of January 14 ran an interesting choice of quotation from the CEC's recent media release on Tony Abbott's dam proposal. "[T]he ever-refreshing Citizens Electoral Council—the only organisation we're aware of that routinely puts the British royal family and the word "genocidal" in the same sentence—has done what it can, pondering aloud whether the Opposition Leader has seen the light amid the floods with his pro-dam talk and aligned himself with the CEC: 'Has Tony Abbott joined the fight, or is he being cynically opportunistic? He'd better be prepared to fight, because it isn't a few feral greenies stopping dams, it's the very British Crown to whom he is so loyal, namely Prince Philip himself, and the organisations he created to impose green fascism on Australia: the World Wide Fund for Nature, the Australian Conservation Foundation and the WWF's Wentworth Group of Concerned Scientists.'"

To compare the CEC's record to that of the growing chorus of leaders, including PM Julia Gillard, who claim that nobody could have seen this crisis coming.
