

## Facing Death: Australian Author Stands by Princess Diana Investigation

author of the *Diana Inquest* series.

Australian investigative writer John Morgan, who has written ten forensic books on the 1997 death of Princess Diana, has revealed he only has months to live.

Morgan, who is viewed by many as the world's leading expert on the death of Princess Diana, has lived with the severe neurological illness Multiple System Atrophy, for the past 12 years.

In a statement released 19 August the NZ-born author said: "Recently symptoms of my illness have worsened considerably and I am now not expecting to live beyond the next few months. "This month marks 18 years since the death of Princess Diana in Paris in August 1997.

"I wish to state categorically that I stand 100% by the results of my forensic investigation into the deaths of Diana and her lover, Dodi Fayed.

"I also state that after having named several people involved in the assassination and many Establishment-connected witnesses who have lied in their evidence, not one person has sought to sue me or clear their name.

"It is my sincere wish that Princes William and Harry will

at some point seek justice for their mother, and that those involved in her murder—and in the subsequent massive cover-up—will finally be held to account for their crimes."

Among its many other ramifications, John's work also inspired CEC Research Director Robert Barwick's article, "British Royals Feel Heat over Diana's Assassination and Charles's Saudi Ties", published in the 11 February 2015 *Australian Alert Service* and 13 February 2015 *Executive Intelligence Review*. The CEC staff extend their heartfelt appreciation to John and Lana for their dedication to their mission, in the face of immense physical hardship. That unwavering dedication produced a comprehensive, meticulously-detailed body of evidence of what *Daily Mail* Investigations Editor Sue Reid called "the biggest scandal of our age"—that Princess Diana was murdered. And, as he proceeded relentlessly with his research over the years, John had the courage to name the ultimate author of that murder, and the names of those who oversaw it and covered it up. As he stated in his summary volume, "Paris-London Connection: The Assassination of Princess Diana", which he issued in 2012 based upon seven earlier volumes, most of 7-800 pages each, "That power rested in the head of the royal family, the Queen. Only she could authorise the assassination of the most famous and photographed person in the world, the mother of the future King of England, the increasingly powerful Princess Diana."

## Did the Queen order the assassination of Diana? Australian investigation builds pressure on scandal-dogged Royals

The latest edition of *Executive Intelligence Review* magazine reports the explosive findings of Australian investigator John Morgan that the Queen ordered the 1997 assassination of Princess Diana, and MI6 carried out her order. "Only she could authorise the assassination of the most famous and photographed person in the world, the mother of the future King of England, the increasingly powerful Princess Diana", writes Morgan.

His conclusion is the result of his decade-long investigation into Diana's death, from which he has assembled an unmatched body of evidence published in 11 books since 2007, including his 2014 *How They Murdered Princess Diana: The Shocking Truth*, a comprehensive summary of all of his previous work.

As the basis for a new play currently in production in London's West End, called *Truth, Lies, Diana*, Morgan's investigation has sparked an uproar in the UK. Playwright Jon Conway drew heavily on Morgan's research, and even included him as a character in the play. In an attempt to divert attention from its central theme—Morgan's charges against the Queen and MI6—most British media coverage focuses on the play's strong insinuation that Diana's lover James Hewitt is the real father of Prince Harry.

Provoked by the release in 2003 of Diana's October 1995 note to her butler Paul Burrell that her husband Prince Charles was planning to kill her in a "car accident", Morgan began to relentlessly investigate all previous findings about Diana's murder, including from the thorough investigation undertaken by *EIR* starting immediately after the crash, and moving on to the official British police inquiry, the Paget Report, released in 2006, and then the long-delayed Inquest undertaken finally in 2008. Though supervised by a judge clearly biased by his sworn personal allegiance to the Queen, the inquest's jury disregarded his explicit instructions to the contrary, and rendered the verdict of "Unlawful Killing"—murder—albeit "by persons unknown".

Morgan brought to the project his professional experience as a forensic accountant, that is, a career of dealing not only with minute detail, but with issues of evidence-handling and court admissibility. He establishes that Diana's outspokenness and post-divorce activities were a clear threat to the Crown, even to the survival of the monarchy itself, and blows apart the

myth that the Queen is a powerless figurehead, proving she exercises real authority over the British government and its key agencies, including the Secret Intelligence Service MI6.

As the 13 February *EIR* documents, this latest eruption of suspicion about Diana's murder comes amidst an escalating wave of scandals now engulfing the Royals. These include:

Crown Prince Charles's intimate ties to the precise Saudi Royals who have served as the long-time financial sponsors of the Wahhabite terrorist networks that include Al-Qaeda and ISIS, and his role for the last three decades as the UK's chief arms dealer to the terror-financing Saudis. Typical are his personal friendships with Prince Bandar bin Sultan and Prince Turki bin Faisal.

The pair were among only eight foreign royals whom Charles invited to his wedding to Camilla in 2005 and have been long time financial sponsors or board members of his Oxford Centre for Islamic Studies, along with several other Saudis implicated in sponsoring terrorism. Both Bandar and Turki are named in a 4000-page lawsuit against the Saudi sponsors of 9/11<sup>2</sup>, filed on 3 February in New York by the families of its victims. Illustrative of the arrogant assumption of Charles and his family that they are above all law, is the controversial name of the new range of ceramic lamp stands, vases and serving bowls he has chosen to peddle at his Highgrove country store: Isis.<sup>3</sup>

Shocking revelations about a paedophile ring involving the highest levels of the British establishment, and even operating within Buckingham Palace. Attention has spilled onto Charles's relationship with monstrous child abuser Jimmy Savile, now deceased, who for three decades was a friend, confidante, adviser and "key aide" to the Prince.

The scandal around Prince Andrew, who is accused of sexually abusing a minor who was pimped to him as a sex slave by Andrew's long time associate, the convicted child abuser and billionaire financier Jeffrey Epstein.

These mounting revelations constitute the most serious assault on the standing and power of the House of Windsor since the days immediately following Diana's murder in 1997. The abundant evidence that John Morgan presents of the Royals' involvement in her murder has the power to finally topple the degenerate House of Windsor.
