

## A Question for Queen Elizabeth:

### Why do you intend to murder 6 billion of the world's presently living 7 billion human beings, including 13-16 million Australians?

#### Queen's envoy declares world population must be less than 1 billion people

Prince Charles visiting his mother's climate change envoy Hans Schellnhuber CBE at Germany's Potsdam Institute.

Professor Hans Joachim Schellnhuber CBE, is Queen Elizabeth's personal envoy on climate change. In 2004 she personally dispatched him to represent her at the U.S. White House, to convince then-President George W. Bush that climate change was a greater threat than global terrorism. For his services, the Queen inducted Schellnhuber as a Commander of the British Empire.

For over 50 years, the Queen and Prince Philip have crusaded against "overpopulation", the obsession of the racist mass-murderous eugenics movement which spawned both Adolf Hitler and modern environmentalism. On March 13, 2009, her envoy Schellnhuber revealed their target for population reduction. Warning a pre-meeting of the Copenhagen Climate Change summit that unless all fossil fuel and nuclear power consumption were shut down immediately, the Earth's temperature would rise by 5°C, Schellnhuber declared:

"In a cynical way, it's a triumph for science, because at last we have stabilised something—namely the estimates for the carrying capacity of the planet, *namely below one billion people.*" (emphasis added)

As for Australia, Schellnhuber's co-thinker Professor Tim Flannery is a trustee for Prince Philip's Worldwide Fund for Nature, and chairman of Australia's Climate Commission. Flannery's June report, "The Critical Decade", was based explicitly on Schellnhuber by name; Flannery has variously called for our population to be reduced to around 6-9 million people.

## The Queen leads the Green charge against human 'overpopulation'

**“The problems which face mankind often seem to defy solution... There are difficulties of over-population...”**

—Queen Elizabeth's 1964 Christmas Address.

Melbourne Herald 19 Oct 1972  
**Queen warns on  
the environment**

**“In the event I am reincarnated I would like to return as a deadly virus in order to contribute something to solving overpopulation.”**

—Queen Elizabeth's consort Prince Philip, the Duke of Edinburgh, reported by *Deutsche Presse-Agentur* (DPA), August, 1988; Philip founded the World Wildlife Fund (WWF) in 1961, and the Australian Conservation Foundation (ACF) in 1963, and was ACF president from 1971-1976.

**“You cannot keep a bigger flock of sheep than you are capable of feeding. In other words conservation may involve culling in order to keep a balance between the relative numbers in each species within any particular habitat. I realise this is a very touchy subject, but the fact remains that mankind is part of the living world.... Every new acre brought into cultivation means another acre denied to wild species.”** —Prince Philip

**“One of the main features of the steady state society will be the need for communities to be in balance with the resources sustainably available in the places where they live (that is with the local carrying capacity). Once the steady state has been achieved international trade in commodities will largely disappear. *Overall populations will be much smaller than the fossil fuel-boosted six and a half billion people of today.*”** (emphasis added)

—“Wilderness and the Future”, by Geoff Mosley, ACF Director under Prince Philip's presidency 1973-1988, excerpted from *Celebrating Wilderness*, Envirobook, Nov. 2008.

Melbourne Herald 13 May 1968  
**Keep tight rein on  
science: Prince**  
SYDNEY. — Prince Philip warned today of the dangers of allowing scientific and industrial development to continue without

**“Having seen our work aimed at a malaria vaccine Prince Philip expressed the view that this would do more harm than good because it would augment the population explosion in Africa.”**  
—*Diversity and Discovery, the History of the Walter and Eliza Hall Institute*, by Sir Gustav Nossal.
